Education

JSS Academy of Technical Education, Noida	2022 – 2026
B.Tech in Electrical Engineering	Current CGPA: 6.2/10
Sri Chaitanya School, Pune	2022
Maharashtra State Board (Class XII)	Percentage: 64%

Experience

Uttar Pradesh Power Transmission Corporation Limited (UPPTCL)	Jul 2025 – Aug 2025
<i>Intern</i>	
- Worked on operation, protection, and maintenance workflows of 132kV and 220kV substations. - Monitored SCADA dashboards for grid status, outage tracking, and load management. - Assisted engineers during testing of transformers, relays, CTs, and PTs. - Supported shutdown procedures, inspection workflows, and technical reporting processes.	

Projects

Opaque: Zero-Knowledge Password Manager
<i>Next.js, TypeScript, React, NeonDB, Clerk Auth, Cryptography APIs, TailwindCSS</i>
Live Project GitHub Repository
- Built a secure password manager using a zero-knowledge architecture where plaintext passwords are never stored in the database. - Implemented client-side encryption workflows ensuring only encrypted cipher data and metadata are persisted. - Designed secure authentication and session handling using Clerk Auth with protected vault access. - Engineered encrypted vault management for storing credentials, notes, and sensitive user data securely. - Focused on security-first architecture including encryption boundaries, secret isolation, and controlled access flows.
Kosha: Personal Cloud Storage Platform
<i>Next.js, TypeScript, AWS S3, Clerk Auth, NeonDB, TailwindCSS, AWS Amplify</i>
Live Project GitHub Repository
- Built a scalable cloud storage platform using direct browser-to-S3 uploads through presigned URLs. - Designed backend architecture where application servers never handle uploaded file bytes directly. - Implemented atomic PostgreSQL transactions for file verification, metadata persistence, and storage accounting. - Integrated secure authentication and access control using Clerk and structured user metadata with NeonDB. - Developed file management features including uploads, downloads, storage quotas, and metadata search.

Technical Skills

Frontend: React, Next.js, Tailwind CSS, Framer Motion
Programming: JavaScript, TypeScript
Cloud & Backend: AWS (S3, Lambda, IAM, Amplify, Route53, CloudFront), REST APIs
Databases & Tools: PostgreSQL, Redis, NeonDB, Supabase, Git, GitHub, Docker, Postman
Authentication & Security: Clerk Auth, Encryption Workflows, Secure Session Handling

Certifications

• AWS Serverless Badge	Jul 2025
• AWS Machine Learning Badge	Jul 2025
• AWS Getting Started with Storage Services	Jul 2025
